# 1. Welcome to MkDocs

---

For full documentation visit [mkdocs.org](https://mkdocs.org).

## 1.1 Commands

---

- `mkdocs new [dir-name]` - Create a new project.
- `mkdocs serve` - Start the live-reloading docs server.
- `mkdocs build` - Build the documentation site.
- `mkdocs -h` - Print help message and exit.

## 1.2 Project layout

---

```
mkdocs.yml    # The configuration file.
docs/
  index.md    # The documentation homepage.
  ...        # Other markdown pages, images and other files.
```

---

## 2. Code Reference

---

### 2.1 Workflow module

---

!!! note "You can disable this behavior with the `replace_admonitions` option." To prevent `pytkdocs` from converting sections to admonitions, use the `replace_admonitions`:

graph LR A[Start] --> B{Error?}; B -->|Yes| C[Hmm...]; C --> D[Debug]; D --> B; B ---->|No| E[Yay!];

```
```md
::: workflow
  selection:
    docstring_style: google # this is the default
    docstring_options:
      replace_admonitions: no
```

So meta!
```
